

Improvement of 203803 inner C.V. Joint's structure

Applications: FORD TOURNEO CUSTOM, FORD TRANSIT

GSP Part No.: 203803

Before Optimization:

After the product is installed, the car is easy to resonate during acceleration, resulting in shaking and vibration of the steering wheel.

After Optimization:

The inner C.V. Joint is optimized from TJ structure to AAR structure, eliminating the shaking and vibration of vehicle and steering wheel caused by product resonance.
